

16 Palm Springs, Corralejo, Fuerteventura

16 is the bungalow on the right next to the tree.

We have provided you with the code and instructions for the key safe.

We strongly recommend that you use the key safe throughout your stay.

By leaving the keys in the key safe every time you leave the apartment you ensure that they never get lost.

It also means that if anyone in the party wants to return to the apartment on their own they can do so with little or no inconvenience to others.

Safety first: Keep the code secure.

Within the apartment we have provided a safe for your valuables. Again, you should use this.

Whilst Fuerteventura is relatively low in crime, tourists are an easy target, so be aware.

Lock all the doors and windows when you go out.

Make sure you have insurance for your holiday.

Paul, Jane & Rhys would like to thank you for choosing our apartment. We hope you will enjoy your holiday.

Welcome! We hope you will find the information contained within this document useful both prior to your holiday and during your stay. You will find a map of Corralejo on the next page and the rest is just information about the apartment.

Air Conditioning

The apartment has two air conditioning units - one in the main bedroom and the other in the living area. Please close all windows and doors when in use. Unlike some older systems, they are modern highly efficient units and do not need to be "pre-run whilst out" as their cooling effect is near instantaneous. We would request that guests practise restraint and consideration in their usage. Whilst sleeping, please close the bedroom door, and for comfort, don't set too cold ... it will become very chilly. Please familiarise yourself with the operating instructions and enjoy sensibly.

Misuse of the facility will result in our costs increasing and lead to us having to charge future renters for their usage, which we don't want to do so please try to follow the guidelines above. Thank you!

Housekeeping/Contacts

Your housekeeper is Kelly Fuller. She is also your contact in case of housekeeping emergency (0034 637725229).

Please note, however, that a charge will be levied for any callouts, replacement keys, etc.

For medical emergencies please call an ambulance (112 from local phones) or contact the Doctor at Brisamar 24 hour clinic 928536402.

16 Palm Springs, Corralejo, Fuerteventura

Water

Tap water is desalinated, chlorinated and clean; it is safe to use for cooking and teeth cleaning. Although the water is safe to drink it really doesn't taste very nice so we recommend the use of bottled water for drinking or in the kettle.

Water is a precious commodity on Fuerteventura and should be used wisely. Please do not leave taps running and shower quickly as hot water tanks once emptied need 1 hour to reheat.

Directions

The complex is officially on Avenida de Fuerteventura. However No. 16 is accessed from a side road which is one way. Therefore on approaching Corralejo go straight over the first roundabout (do not turn right onto Avenida de Fuerteventura). Take the first right (there is a sign for Hotel Arena) into Avenida del Morro and follow it down past Hotel Arena on your right to a small junction (Infiniti apartments opposite to the left). Continue on down and Palm Springs is the last complex on the left. No. 16 is the first apartment you see. Parking is adjacent the entrance on the left (yes. I'm afraid you will have to drive over the pavement!)

Please note: the red line on the map indicates the bus route.

Please note we cannot accept liability for any death, personal injury, sickness, accident, loss (including luggage and personal affects), suffered by you or any other visitor to the apartment or swimming pool.
